

SAFI quickly developed our sea-freight services in a few years time and gained reputation in this market as well as worldwide destinations with the assistance of our valuable partner network. We handle about 10,000 teus and 2,200 LCL shipments each year. Teus exported & imported through Ho Chi Minh City and Hai Phong ports. A major part of commodities are shoes and garments being exported to European main ports.

Middle part of Viet Nam is becoming more important by acting as gateway not only for export cargo from middle-part-of-vietnam provinces but also for transit cargo from our neighbour country - Laos. SAFI makes the most of the service-offer possibility by its Da Nang Branch office.

To create more options for our clients during peak cargo season and so they do not need to spend greater amounts on airfreight and suffer from long time of transportation by seafreight, our Sea Freight Department offers sea-air service via UAE and Singapore to ensure traders' cargo arrives on time and at reasonable cost.

For future development, we are aiming at the North-American market, which we believe will see an unexpected boom and represents an opportunity we should grasp.

SAFI FBL is insured for all risks.
