

Our place in the import and export shipping industry also provides us with the expertise to offer additional services as a buying agent for your products, as well as acting as distributor of your products in the Vietnamese market. We understand and appreciate the value of making connections between Vietnamese businesses and overseas businesses for sourcing and distribution. Our attention to this vital aspect of international trade links the two important areas of shipping/forwarding

and trading together.

To promote the two way trade of importing and exporting products to/from Vietnam, we undertake on behalf of customers, their requests and requirements for sourcing and distribution services, along with all related shipping services to insure a complete range of import and export operations.

The way to connect the world!
